## 1 Short Introduction

### 1.1 The list of parameters

You may want to keep the list given in table 1 at hand when viewing the results.

## 2 Definitions

The averages shown here are *unweighed* averages:

$$\bar{x} = \frac{1}{N} \sum_{i=1}^N x_i \quad (1)$$

with  $N$  the number of observations in the dataset.

The spread of the measurements is indicated with the variance  $V(x)$ , or rather the standard deviation  $\sigma(x) = \sqrt{V(x)}$ .

$$V(x) = \frac{1}{N-1} \sum_{i=1}^N (x_i - \bar{x})^2 \quad (2)$$

We also report the more robust statistics median, minimum, maximum, various percentiles and inter quartile range.

The median  $m$  is the value of parameter  $x$  for which half of the observations of  $x$  is smaller than  $m$ :

$$P(x \leq m) = P(x \geq m) = \int_{-\infty}^m f(x) dx = \frac{1}{2} \quad (3)$$

with  $f(x)$  the probability density function.

The median is a special case of a percentile. Instead of 1/2 in equation 3, other threshold values can be used. We report results for 1 %, 5 %, 10 %, 15.9 %, 25 %, 75 %, 84.1 %, 90 %, 95 % and 99 %. The inter quartile range is the difference between the 75 % and 25 % percentiles. Similarly the minimum and maximum values correspond to the 0 % and 100 % percentiles respectively.

For normally distributed parameters the mean and median are the same, while the  $\mu \pm \sigma$  values and the 15.9 % and 84.1 % percentiles coincide.

To get a measure for the relation of one variable  $x_{(k)}$  with another  $x_{(l)}$ , we calculate the covariance matrix  $C_{kl}$ .

$$C_{kl} = C(x_{(k)}, x_{(l)}) = \frac{1}{N-1} \sum_{i=1}^N (x_{(k),i} - \bar{x}_{(k)})(x_{(l),i} - \bar{x}_{(l)}) \quad (4)$$

Rather than a dimensionally dependent covariance, it is often easier to interpret a correlation matrix  $R_{kl}$ , a matrix of Pearson's  $r$  coefficients:

$$R_{kl} = R(x_{(k)}, x_{(l)}) = \frac{C_{kl}}{\sqrt{C_{kk}C_{ll}}} = \frac{C_{kl}}{\sqrt{V(x_k)V(x_l)}} \quad (5)$$

The diagonal elements of the covariance matrix are the variances of the elements,  $V(x_{(k)}) = C_{kk}$  and obviously  $R_{kk} = 1$ .

Table 1: Parameterlist and basic statistics for the analysis

| Variable                                                                            | mean $\pm \sigma$                    | Count  | Mode                    | IQR                    | Median                  | Minimum                 | Maximum                |

Figure 31: Histogram of “Number of iterations” for 2024-09-18 to 2024-09-20

Figure 32: Histogram of “Fluorescence” for 2024-09-18 to 2024-09-20

## 9 Along track statistics

The TROPOMI instrument uses different binned detector rows for different viewing directions. In this section statistics are presented for each of the binned rows in the instrument.

Figure 33: Along track statistics of “QA value” for 2024-09-18 to 2024-09-20

Figure 34: Along track statistics of “Mole fraction of CH<sub>4</sub>” for 2024-09-18 to 2024-09-20

Figure 35: Along track statistics of “Precision of mole fraction of CH<sub>4</sub>” for 2024-09-18 to 2024-09-20

Figure 36: Along track statistics of “Bias corrected mole fraction of CH<sub>4</sub>” for 2024-09-18 to 2024-09-20

Figure 37: Along track statistics of “Number of points in the spectrum” for 2024-09-18 to 2024-09-20

Figure 38: Along track statistics of “Spectral offset SWIR ( $\lambda_{\text{true}} - \lambda_{\text{nominal}}$ )” for 2024-09-18 to 2024-09-20

Figure 39: Along track statistics of “ $\chi^2$  (SWIR)” for 2024-09-18 to 2024-09-20

Figure 40: Along track statistics of “ $\chi^2$  (NIR)” for 2024-09-18 to 2024-09-20

Figure 41: Along track statistics of “Degrees of freedom” for 2024-09-18 to 2024-09-20

Figure 42: Along track statistics of “Number of iterations” for 2024-09-18 to 2024-09-20

Figure 43: Along track statistics of “Fluorescence” for 2024-09-18 to 2024-09-20

## 10 Coincidence density

To investigate the relation between parameters scatter density plots are produced. These include some ‘hidden’ parameters, latitude and the solar- and viewing geometries, in addition to all configured parameters. All combinations of pairs of parameters are included *once*, in one direction alone.

Figure 44: Scatter density plot of “ $\chi^2$  (NIR)” against “Degrees of freedom” for 2024-09-18 to 2024-09-20.

Figure 45: Scatter density plot of “ $\chi^2$  (NIR)” against “Fluorescence” for 2024-09-18 to 2024-09-20.

Figure 46: Scatter density plot of “ $\chi^2$  (NIR)” against “Number of iterations” for 2024-09-18 to 2024-09-20.

Figure 47: Scatter density plot of “ $\chi^2$  (SWIR)” against “ $\chi^2$  (NIR)” for 2024-09-18 to 2024-09-20.

Figure 48: Scatter density plot of “ $\chi^2$  (SWIR)” against “Degrees of freedom” for 2024-09-18 to 2024-09-20.

| 95  | Scatter density plot of “Solar zenith angle” against “ $\chi^2$ (SWIR)” for 2024-09-18 to 2024-09-20. . . . .                                                                                        | 104 |
| 96  | Scatter density plot of “Solar zenith angle” against “Degrees of freedom” for 2024-09-18 to 2024-09-20. . . . .                                                                                      | 105 |
| 97  | Scatter density plot of “Solar zenith angle” against “Fluorescence” for 2024-09-18 to 2024-09-20. . . . .                                                                                            | 106 |
| 98  | Scatter density plot of “Solar zenith angle” against “Latitude” for 2024-09-18 to 2024-09-20. . . . .                                                                                                | 107 |
| 99  | Scatter density plot of “Solar zenith angle” against “Mole fraction of CH <sub>4</sub> ” for 2024-09-18 to 2024-09-20. . . . .                                                                       | 108 |
| 100 | Scatter density plot of “Solar zenith angle” against “Bias corrected mole fraction of CH <sub>4</sub> ” for 2024-09-18 to 2024-09-20. . . . .                                                        | 109 |
| 101 | Scatter density plot of “Solar zenith angle” against “Precision of mole fraction of CH <sub>4</sub> ” for 2024-09-18 to 2024-09-20. . . . .                                                          | 110 |
| 102 | Scatter density plot of “Solar zenith angle” against “Number of iterations” for 2024-09-18 to 2024-09-20. . . . .                                                                                    | 111 |
| 103 | Scatter density plot of “Solar zenith angle” against “Number of points in the spectrum” for 2024-09-18 to 2024-09-20. . . . .                                                                        | 112 |
| 104 | Scatter density plot of “Solar zenith angle” against “Spectral offset SWIR ( $\lambda_{\text{true}} - \lambda_{\text{nominal}}$ )” for 2024-09-18 to 2024-09-20. . . . .                             | 113 |
| 105 | Scatter density plot of “Viewing zenith angle” against “ $\chi^2$ (NIR)” for 2024-09-18 to 2024-09-20. . . . .                                                                                       | 114 |
| 106 | Scatter density plot of “Viewing zenith angle” against “ $\chi^2$ (SWIR)” for 2024-09-18 to 2024-09-20. . . . .                                                                                      | 115 |
| 107 | Scatter density plot of “Viewing zenith angle” against “Degrees of freedom” for 2024-09-18 to 2024-09-20. . . . .                                                                                    | 116 |
| 108 | Scatter density plot of “Viewing zenith angle” against “Fluorescence” for 2024-09-18 to 2024-09-20. . . . .                                                                                          | 117 |
| 109 | Scatter density plot of “Viewing zenith angle” against “Latitude” for 2024-09-18 to 2024-09-20. . . . .                                                                                              | 118 |
| 110 | Scatter density plot of “Viewing zenith angle” against “Mole fraction of CH <sub>4</sub> ” for 2024-09-18 to 2024-09-20. . . . .                                                                     | 119 |
| 111 | Scatter density plot of “Viewing zenith angle” against “Bias corrected mole fraction of CH <sub>4</sub> ” for 2024-09-18 to 2024-09-20. . . . .                                                      | 120 |
| 112 | Scatter density plot of “Viewing zenith angle” against “Precision of mole fraction of CH <sub>4</sub> ” for 2024-09-18 to 2024-09-20. . . . .                                                        | 121 |
| 113 | Scatter density plot of “Viewing zenith angle” against “Number of iterations” for 2024-09-18 to 2024-09-20. . . . .                                                                                  | 122 |
| 114 | Scatter density plot of “Viewing zenith angle” against “Number of points in the spectrum” for 2024-09-18 to 2024-09-20. . . . .                                                                      | 123 |
| 115 | Scatter density plot of “Viewing zenith angle” against “Solar zenith angle” for 2024-09-18 to 2024-09-20. . . . .                                                                                    | 124 |
| 116 | Scatter density plot of “Viewing zenith angle” against “Spectral offset SWIR ( $\lambda_{\text{true}} - \lambda_{\text{nominal}}$ )” for 2024-09-18 to 2024-09-20. . . . .                           | 125 |
| 117 | Scatter density plot of “Spectral offset SWIR ( $\lambda_{\text{true}} - \lambda_{\text{nominal}}$ )” against “ $\chi^2$ (NIR)” for 2024-09-18 to 2024-09-20. . . . .                                | 126 |
| 118 | Scatter density plot of “Spectral offset SWIR ( $\lambda_{\text{true}} - \lambda_{\text{nominal}}$ )” against “ $\chi^2$ (SWIR)” for 2024-09-18 to 2024-09-20. . . . .                               | 127 |
| 119 | Scatter density plot of “Spectral offset SWIR ( $\lambda_{\text{true}} - \lambda_{\text{nominal}}$ )” against “Degrees of freedom” for 2024-09-18 to 2024-09-20. . . . .                             | 128 |
| 120 | Scatter density plot of “Spectral offset SWIR ( $\lambda_{\text{true}} - \lambda_{\text{nominal}}$ )” against “Fluorescence” for 2024-09-18 to 2024-09-20. . . . .                                   | 129 |
| 121 | Scatter density plot of “Spectral offset SWIR ( $\lambda_{\text{true}} - \lambda_{\text{nominal}}$ )” against “Number of iterations” for 2024-09-18 to 2024-09-20. . . . .                           | 130 |

## List of Tables

|   |                                                                                                           |   |
|---|-----------------------------------------------------------------------------------------------------------|---|
| 1 | Parameterlist and basic statistics for the analysis . . . . .                                             | 2 |
| 2 | Percentile ranges . . . . .                                                                               | 3 |
| 3 | Parameterlist and basic statistics for the analysis for observations in the northern hemisphere . . . . . | 4 |
| 4 | Parameterlist and basic statistics for the analysis for observations in the southern hemisphere . . . . . | 5 |
| 5 | Parameterlist and basic statistics for the analysis for observations over water . . . . .                 | 6 |
| 6 | Parameterlist and basic statistics for the analysis for observations over land . . . . .                  | 7 |
| 7 | Correlation matrix . . . . .                                                                              | 8 |
| 8 | Covariance matrix . . . . .                                                                               | 9 |
